Norma Shearer in

### "A Lady of Chance"

Hello! Hello! Norma Shearer on the wire. You must  
come over to see my newest picture.... I'm a telephone girl  
in it—and my wires reach up into Society and down into the  
underworld. You'd never guess the thrills! I think it's my  
best picture. See you soon." The snappy story of a big city  
gold digger and a small town hick who taught her a lesson.

This Week

### "Win That Girl"

Coming

### "The Toilers"

Note—This Sat. Nite "The Georgian Singers"  
Big Double Program.

## Change the Dinner Menu

Cold weather demands meals with a high Food Value,  
and what is nicer than a well cooked Roast of Pork?

This we have some especially nice Champion Pork  
for Champion people.

## Champion Meat Market

## C. E. Anderson Dies on Tuesday

The death on Tuesday after-  
noon of C. E. Anderson after an  
illness of some two months  
came as a shock to the com-  
munity, although it was under-  
stood he was sinking fast for  
the two days preceding his  
death. The funeral took place  
at Calgary on Thursday, the  
ceremony being conducted by  
Perfection Lodge A.F. & A.M.  
and Rev. Mr. McNeven. There  
was a large turnout from  
Champion as well as from Cal-  
gary and banks of flowers here  
bore mute testimony to the esteem  
in which the deceased was held.  
The family have the sympathy  
of the entire community in  
their sad bereavement. The  
deceased was 40 years old.  
Owing to lack of essential in-  
formation an obituary notice  
is held over until next week.

## M. A. McNaughton Dies Suddenly

Practically every resident in  
this community will hear with  
regret of the death of M. A.  
McNaughton, at his home in  
Wasaie, N. Y., on Monday, Jan.  
6th. A severe cold coupled  
with asthma was the immediate  
cause of his death, his heart  
being unable to stand the  
strain. The deceased had lived  
in this vicinity and made an  
annual trip here in connection  
with his interests. He was very  
widely known, having been in  
the employ of the C.P.R. as a  
land inspector in the early days.  
His surviving relatives will  
have the sympathy of his many  
friends in this community.

## Amos McLeod's Residence Burned

On Tuesday, Jan. 21st, the  
residence of Amos McLeod was  
burned together with most of  
the contents. J. J. Ryan, who  
was in charge of the premises  
during the absence of the owner  
in the States, made every effort  
to combat the blaze and later to  
save the contents of the build-  
ing. Only the timely arrival of  
neighbours prevented his being  
added to the list of casualties.  
He was rescued through a  
window when nearly all in. As  
far as can be learned there was  
no insurance.

Champion hockey team took  
the short end of a 3-1 score  
in a contest with Carmangay  
on Thursday night. The locals  
were short of men and played  
without substitutes. There  
was a fair turnout to the game.

F. J. Clapp, Geo. Orr and P.  
Helm are representing Cham-  
pion at the Calgary hospital,  
securing the fourth man in  
Calgary after playing several  
games with three men. They  
are still in two competitions as  
far as can be learned.

Geo. Jordan left for Roches-  
ter, Minn., recently to accom-  
pany his brother, J. Jordan of  
Bassano to his home. The lat-  
ter has been at Rochester for  
some six weeks.

The Scotch concert advertised  
for Wednesday, Jan. 22, and  
postponed owing to the death  
of C. E. Anderson will be held  
on Wednesday, Jan. 20.

## Pioneer Club Celebrates

The annual gathering was  
held on Friday evening Jan-  
uary 17, 1930 in the Community  
Hall, Champion. Extremely  
cold weather was experienced  
the thermometer registering 45  
below zero on Thursday Jan-  
uary 16th, with the result that  
a change of date for the gather-  
ing was considered, but fortu-  
nately Friday was a much  
better day from the weather  
standpoint, with the result  
that though a number of people  
were deterred from attending  
on account of weather con-  
ditions, a large and represen-  
tative gathering took place. The  
president A. J. Miller was in  
the chair. The meeting opened  
with the singing of "O Canada"  
by the audience, Mrs. M. Sison  
accompanying on the piano.  
A short programme was then  
given by Miss M. Ferguson,  
Mesdames M. Sison, M. D.  
Chamberlain and A. Hopkins,  
all the items being much appre-  
ciated by the audience. Dancing  
then took place, music being  
furnished by Fraser orchestra  
assisted by Miss Gladys Rhodes  
and Messrs. B. Hummel and  
A. Hopkins. Art Hopkins very  
ably filled the position of floor  
manager.

Lunch was served at midnight  
in the dining hall, two sittings  
being required to accommodate  
the large number of guests this  
year an innovation was made  
in the handling of supper  
arrangements, the committee  
engaging A. W. Jopling to  
attend to that part of the  
evening program, and with the  
help of a number of very  
willing helpers, he carried out  
his duties to the satisfaction of  
all concerned.

At the conclusion of the  
supper, the annual business  
meeting was held, the president  
A. J. Miller in the chair, the  
secretary treasurer, H. C. Opper  
read the minutes of the last  
annual meeting, also a financial  
statement showing the sum  
of \$340 on hand at the date of  
the annual meeting. G. H.  
Mark moved and R. Tyler  
seconded a resolution that the  
minutes and the financial state-  
ment be accepted. The resolu-  
tion was carried.

Nominations were called for  
president, R. Tyler moved and  
G. H. Mark seconded the nomi-  
nation of H. J. Higgins as  
president. G. L. Dupue moved  
and G. F. Smith seconded a res-  
olution that nominations close,  
the resolution was carried and  
H. J. Higgins declared elected,  
G. F. Smith nominated and G.  
L. Dupue seconded the nomi-  
nation of Louis Fath as Vice-  
president. M. D. Chamberlain  
moved and G. H. Mark seconded  
a resolution that nominations  
close, the resolution was carried  
and Louis Fath declared elected  
as vice-president. For the  
three directors to be elected in  
the place of Messrs. A. A.  
Warner, H. A. Williams and R.  
S. Bond whose terms had ex-  
pired, G. L. Dupue nominated  
and G. H. Mark seconded E.  
Griffin, Fred Wise nominated  
and H. J. Higgins seconded, G.  
H. Beaubier, R. Tyler nomi-  
nated and L. Miller, seconded S.  
Beingsener. L. Miller moved  
and G. H. Mark seconded a  
resolution that nominations  
close, the resolution carried  
and Messrs. G. H. Beaubier, E.  
Griffin and S. Beingsener  
were declared elected as direct-  
ors for the next three years.

H. J. Higgins thanked the  
gathering for the honor con-  
ferred upon him and promised  
(Continued on back page.)

THURSDAY, Jan. 23, 1930

## NOTES AND COMMENT.

The annual report of the Women's Institute indicates that the organization is up and doing all the time. The expenditure also indicates the wide range of their activities in rendering assistance and attention where it is needed both to the public and also to its divisions. There is every reason for the members to congratulate themselves on their success as community builders.

In Great Britain, Hungary, Sweden and the Irish Free State traffic must "Keep to the left." The rest of the world chooses the right side of the road—sometimes—Christian Science Monitor.

Automotive exports from Germany in 1928 showed an increase of 71 per cent over the previous year. Before the war Germany ranked next to the United States and France in automotive exports. It is now in sixth place and is gradually bidding for its pre-war position.

"I want to sing a song of hope to the despairing; to breathe the breath of love that will chase away all hating. I believe that right will ultimately conquer wrong, virtue conquer vice, harmony take the place of discord."—Aggrey of Africa.

Canada's increasing popularity among American tourists is evidenced in that about 4,000,000 persons visited Canada last year and spent approximately \$200,000,000, according to a report by the Canadian Department of National Revenue.—Christian Science Monitor.

Statistics have shown that Canadians eat more butter and eggs per capita than the people of any other country. A recent survey made by the Canadian federal department of agriculture shows that one of the favorite beverages of the people of Canada is milk. To satisfy their demand for fresh milk alone takes 45,025,000 gallons a year, or about one pint per head of population per day. This increased use of milk has been brought about largely not only by a better appreciation of the value of this product in the diet, but also by the improvement that has been made in its production and general handling. Dairying is one of the most important industries in Canada. The total annual value of dairy products is more than \$250,000,000.

The total value of the principal field crops of Canada for 1929 is estimated at \$986,986,000, about \$40,000,000 less than in 1928.

It is expected that the new Welland ship canal, which connects Lake Erie with Lake Ontario and has been built at a cost of about \$120,000,000 by the

Dominion government, will be officially and formally opened on July 1, 1930, with befitting ceremony.

Two golfers playing an important tie were annoyed by a slow couple in front of them, obviously new to the game.

At one hole there was a particularly long wait. One of the offending couple dawdled on the fairway while his companion searched in the rough. At length the waiting couple on the tee could contain their impatience no longer.

"Why don't you help your friend find his ball?" one shouted indignantly.

The idle golfer in front turned with a cheerful smile. "Oh, he has got his ball," he replied blandly. "He is looking for his clubs."—Tit-Bits.

## Depth to Plow Summerfallow

(Experimental Farms Note)

Any change which effects a major operation in the large cultural practice in prairie agriculture should be of paramount interest to western farmers, consequently the depth of ploughing summer fallow has been a subject of much painstaking investigation by experimental farms on the prairies. For many years, six inches has been regarded as the standard depth of ploughing summer fallow. The idea has been prevalent that this depth or even deeper ploughing created a reservoir for the storage of moisture. The question naturally arises—how deep should summer fallow be ploughed? Covering a period of

fourteen years an experiment has been in progress at the Dominion Experimental station, Scott, to determine the best depths for ploughing summer fallow and to test the value of subsoiling. The summer fallow was ploughed in June three to eight inches deep and in addition depths from five to eight inches were subsoiled below the sole of the furrow. Additional cultivation was given throughout the season to control weeds. The rotation used was, summer fallow, wheat and oats. The results have shown that there is no advantage in ploughing summer fallow deeper than four inches when a

good job can be done at that depth, and that subsoiling does not increase the yield, much less pay for the extra cost involved. The results of this experiment have a wide application in that moisture is apparently equally well conserved that operation is less expensive and annual weeds can be more readily kept in check. Your nearest experimental farm will gladly inform you how these results (or the ploughless summer fallow) apply to your particular conditions.

## Churchill Now Experiencing Its Last Lone Winter Before Advent of New Era Next Spring

Churchill is in the midst of its last lone winter. Except for some 20 men—and a single woman—every resident at the Government owned port has moved out to the south. The last scheduled Mackay Island putted down to the Pas in early December and now the mail is "mashed" twice a month by dog team from Clilam, at Mile 27.

Ice-locked, the 250-year-old harbor is deserted until next spring.

A skeleton force at Churchill is retained by the Hudson Bay Railway which completed the first laying of steel to the harbor 511 miles north-east of The Pas last March, and by the Department of Railways and Canals. But all railway construction and dock labor is at an end for several months. Three men remain at the government radio post, and one at the telegraph office; the Hudson Bay Company trading post continues its work; and Rev. H. A. Gibson and his wife reside at the Anglican Mission.

Otherwise the settlement at the mouth of the Churchill River, where 1,500 men toiled last summer, is abandoned to the chill winds blowing from the sea.

In all probability, however, the Bay port of the West will never know another so lifeless stretch between autumn and spring. It is certain that the opening of the settlement to the public, planned for next spring, will mark the beginning of a record at least partially permanent residence at Churchill. Undoubtedly, ingress to the end of the Hudson Bay Railway steel will be closely scanned by the Dominion Government; but a new town will begin to take form when the way is opened to prospective settlers.

The fact that harbor construction work is not expected to reach completion until sometime in 1931 will not prevent a hurried surge of new citizens to Churchill. As yet, under government ruling, three banking establishments alone have marked the arrival of commerce; numerous applications, however, for permission to set up establishments which might flourish on the trade of hundreds of residents busy at the harbor have been received.

Divers considerations, no doubt, have influenced the government in the decision to supervise closely the settlement's early development. Housing accommodation at present is sufficient only for those busied at railway and harbor work; and under existing conditions, water supply and sewage problems yield to but temporary solution. When Churchill assumes the status of a town, it is expected that these difficulties will have been solved.

As a harbor, nevertheless, Churchill has not been neglected by nature. Before it swells into the shape of an oval bottle with its neck to the sea—a ready-made port. Besides, projecting headland and an island protect the opening so that the harbor has little effect on the inner harbor, enclosed as it is by rocky cliffs which rise in some cases to a height of 70 feet.

Along one side of the Churchill River runs the Hudson Bay Railway, reaching almost to the end of a narrow point project jutting out into the bay. It is at the base of this point, formed of rugged rock ridged by the years, that the townsite, no doubt, will be located; and it is on this side of the river that the government is constructing its harbor works.

According to the report of Frederick Palmer, British engineer in charge by the Dominion Government in 1927, to advise regarding the suitability of Nelson and Churchill as harbors, the harbor expected can be easily increased by a little dredging to accommodate as many and as large

Lady: "Aren't you the man I gave a glass of port to the other day?"  
Tramp: "Yes, and now I have come to see if you could sell me a bottle."  
—En. Rolig Hall Tanna, Copenhagen.

W. N. E. 1921

## Reproduce Hotel in Sugar

A large model in sugar of the great Canadian Pacific Hotel at Toronto. The Royal York, forty-two inches in height, has been made by Harry Astley, chief confectioner of the inner "Empress of Scotland." The model was exhibited at the Confectioners Exhibition, London, England, this month.

### Forest Area Of Canada

Jack Pine Is Now Used Extensively For Railway Ties

The forest area of Canada is estimated at 1,151,454 square miles. Of this area, 855,880 square miles are productive and accessible; a little over one-third of this area bears timber of merchantable size and the remainder carries young growth not yet fit for use. It is also noted that the jack pine is now used more than any other wood for railway ties because of its natural strength and its adaptability to creosoting treatment.

Great Britain has doubted its use of electricity within the past six years.

### Encouraging Sheep Industries

Manitoba Department Of Agriculture Distributing Breeding Stock To Beginners

Reports from the livestock branch, Manitoba Department of Agriculture, show approximately 140 head of rams distributed to breeders, mostly beginners, who received cows from the Manitoba Livestock Credit Company, from recent importations. Of the number about 10 are Shropshires, 52 Oxford, 12 Suffolk, and six Hampshire.

Ancient Egypt looked to Arabia for chief supplies of perfume materials.

## FASHION

No. 115—Cool and Summery. This style is designed in sizes 10, 12, 14, 16, 18, 20, 22, 24 and 42 inches bust measure. Size 16 requires 2 1/2 yards of 40-inch material with 5/8 yard of 40-inch contrasting.

No. 212—Molded Waistline. This style is designed in sizes 10, 12, 14, 16, 18, 20, 22, 24 and 42 inches bust measure. Size 30 requires 3 1/2 yards of 40-inch material with 5/8 yard of 40-inch contrasting.

No. 908—Thin, Slender, Smart. This style is designed in sizes 20, 22, 24 and 42 inches bust measure. Size 20 requires 3 1/2 yards of 40-inch material with 5/8 yard of 40-inch contrasting.

## Soil Of Canada Has Played A Large Part In Giving U. S. Some Of Its Greatest Citizens

### Closely Related To Marquis

In Two Years Reward Wheat Captured World's Championship

Reward wheat, a hard red spring variety with which Joseph H. B. Smith, of Wolf Creek, Alberta, won the world's wheat championship at the 1929 International Grain and Hay Show, Chicago, is closely related to the famous Marquis wheat. It was developed from a cross between Marquis and Prelude, in 1912, at the Canadian Government Central Experimental Farm in Ottawa, with the hope of developing a variety that would combine the early ripening habits of Prelude with the greater productiveness and better straw of Marquis. The cross resulted in several exceedingly interesting and promising combinations, one of them received the name of Reward. This new variety, as it now exists, matures in less than one hundred days from the time of planting, or of about fourteen days earlier than Marquis takes to mature. Reward produces an excellent quality of flour and a very fine appearing kernel. The straw is long and erect, and stands firm. It was first released to farmers in western Canada and elsewhere in commercial quantities in 1929, and within two years had captured the world's championship.

### Educational Films

United States Government Loans Motion Picture Films To Canada

Through the courtesy of the United States Government Bureau of Mines, the Canadian Department of Mines, Ottawa, has received the following motion picture films for free circulation through Canada:

- "The Story of Sulphur" (2 reels).
- "The Story of Rock Drilling" (2 reels).
- "The Story of Steel" (6 reels).
- "The Story of Gasoline" (3 reels).
- "Hent Treatment of Steel" (2 reels).
- "Through Old Lands of Europe and Africa" (2 reels).
- "The Story of Dynamite" (2 reels).
- "Carbon Monoxide: The Invisible Danger" (1 reel).

These films are all on standard (35 mm.) stock and in all modern, easily obtainable format. "The Story of Rock Drilling."

No charge is made for the rental of the films, but the borrower is expected to pay express charges. Application for the loan of any of these films should be addressed to the Director, Geological Survey, Department of Mines, Ottawa, Canada.

### Champion Back At Work

The Prize Hen Of Saskatchewan University Keeps Up Record

Lady Victorine, the world's champion hen, is back at work after completing her year's record of 350 eggs. She laid 16 more eggs before commencing to moult on September 27 last. Saskatchewan has been recording such temperatures as 42 below zero, but this barred Rock hen, who lives in an unheated house at the University of Saskatchewan, started in last week and is again laying her daily egg.

Professor Baker commented on the size of the eggs this hen is producing. After one small preliminary egg was tried out, the seven eggs produced during the past eight days have averaged five grams each over the standard egg weight.

A request was received from the committee of the Madison Square Garden Poultry Show, at New York, for the loan of the hen as a special exhibit. It was decided, however, that it was undesirable to send the hen to the show as the university wish to obtain as many chicks as possible from such desirable breeding stock.

Much Ado About Nothing  
"For 10 years, 10 long and lean years," cried the writer, "I have been waiting for a change in the word here, a line there, working on it until my fingers were cramped and aching, my brain and body weary from the toll."

"Too bad, too bad," the poducer murmured sympathetically. "All work and no play?"

Hydro Development In West  
With four large undertakings at present under construction, which will ultimately provide 445,000 h.p. hydroelectric development in the Prairie Provinces, there are indications of a boom in industrial activity for 1930 and 1931.

"The plot thickens," said the old lady as she sewed the grass seed for the third time.

Northward into the Canadian West there is a slow but increasing migration of men and women from the United States. Counting long enough this may make up for the loss of population during the past century of Canadian citizens to the great republic.

It may not be so stated in United States school books, but the soil of Canada has played a part directly or indirectly in furnishing the United States with some of its greatest citizens.

In a little churchyard in Norwich, Oxford County, Ontario, rest some of the maternal ancestors of President Herbert Hoover. In the early days they fled from the rocky fields of a Pennsylvania farm to take up abode in Canada. Near Norwich, on a hill that was not the best, they struggled on for many a year. Then the news of free land in Iowa caused Hoover's grandparents to yoke up the oxen and head west. Toil and poverty were the lot of these first Quaker people. In it they found the secret of their new lives. They received with sympathy the pleadings for assistance of the farmers of the United States.

President Hoover's people left Oxford County for Iowa about the time that Thomas A. Edison got a job as telegraph operator in a little town north of Norwich at Stratford, in the County of Perth. It is 50 years since Edison invented the incandescent lamp and it is said that he neglected his routine work in the railway station at Stratford to carry on his experiments in electricity.

In the seventies a boy ran away from Victoria, British Columbia, to a circus. His father, a Jew, who had met disaster in the Cariboo goldfields, mourned for David Belasco for many a day. Then David, who was supposed to be dead, turned up very much alive. He lived to become probably the greatest producer in the theatre of American stages.

These are but a few examples of famous citizens of the United States who have often referred to the influence upon their lives or the lives of their parents of the free and invigorating air of the Dominion of Canada. A complete list would include probably scores of names, among them such notable figures as the late William B. Eidl, builder of the Great Northern Railway, native of Guelph, Ontario; the late Franklin K. Lane, minister in Woodrow Wilson's cabinet, from the Maritimes; and Captain Robert Dollar, shipping magnate, of Scottish origin, but for many years a citizen of the Ottawa Valley—Vancouver Province.

### Horses Were Poisoned

Water From Abandoned Wells Was Responsible For Loss Of Animals

In Southern Saskatchewan

That a poison which seven days killed a 1,400-pound horse in three days is produced by bacteria in old wells in Saskatchewan, has been discovered by Dr. S. Fulton, professor of bacteriology at the University of Saskatchewan. In one district 30 miles square, from 75 to 100 horses have been lost this winter. On one farm 8 out of 14 horses died. Losses have been common in the south and west of the province. Attention was paid to the water supply where outbreaks occurred and it was found that in each case old wells had been opened owing to the particularly dry season. Although the wells contained water which appeared fresh, bacteriological examination showed the presence of virulent strains of botulism in three out of four wells.

The bacteria isolated from these water sources in the last year, reports Dr. Fulton, produced a poison of which seven days killed a 1,400-pound horse in three days.

Small quantities of the water itself when fed to experimental animals caused death in a few days.

"I will meet you Wednesday, on next week."

"I have to go to American next Wednesday."

"Then shall we say Thursday?" —Cut curls, Madras.

### Nest Colds

**Need Direct Treatment**

It is an obvious fact that colds indeed that can resist the direct double action of Vicks. Rubbed on the chest, it acts 2 ways at once:

- (1) Direct to air passages with its healing vapors released by body heat;
- (2) Direct, like a poultice, it "draws out" the soreness.

### The Singing Fool

By HUBERT DAILEY  
Copyright, 1935, Warner Bros. Pictures

**SYNOPSIS**

Al Stone, singing waiter at Blackie Joe's New York night club, marries Molly Winton, a ballad singer, not knowing he is loved by Grace Farrel, a loyal little cigarette girl. After Al's fame as a composer of popular songs, Molly elopes with John Perry, a wealthy playboy, and Grace, who has loved Al since she was a child, is broken by the loss of her man, becomes a desolate, but is saved by Grace Farrel, and recovers to appear in a Broadway review. One night she receives a letter from Molly and rushes to a hospital to find John fatally ill. He sings to Junior, but his son dies. Then Al dashes back to the theatre to find he must sing the same song to his audience.

**CHAPTER XXXI**

The bright lights on, the stage was empty, the orchestra played the opening bars that heralded Al's entrance. But still he stood in the wings as if in a trance, motionless, attempting the song he had just sung to his dying child. The orchestra stopped, started again, and the stage manager ran toward Al.

"That's your number, big boy." "I can't sing that song," protested Al. "Not tonight."

The stage manager saw something was wrong, but he didn't know what. "It's too late to change, now, Al. It's your bit song. Think of the show!"

The show! Al walked on the stage, driven by sheer force of will. The bright lights, there were the orchestra leader, beyond were the dim sea of faces of the audience. Without knowing it he fell into his character, the happy-go-lucky singing fool. A roar of applause came up and met him like a great gust of wind. He knew it, he felt it, he carried on. The stage manager relaxed and turned to Grace. "What's the matter with him?"

Quickly Grace explained and they both watched Al with anxious eyes. Would he make it? He was singing bravely but it was apparent to them well trained ears that he was faltering now and then. When he came to the chorus the quaver in his voice was too intense. Once his voice broke entirely.

### Weak After Operation

After having an operation, I was very miserable, weak, nervous and sick. I was unable to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no more pain, my nerves are better. I feel safe in saying Lydia E. Pinkham's medicine has helped me wonderfully.—Mrs. Wm. H. Bechteler, Box 142, Port Colborne, Ontario.

### Lydia E. Pinkham's Vegetable Compound

It cures all kinds of ailments. It is a natural remedy for women's troubles. It is a natural remedy for women's troubles. It is a natural remedy for women's troubles.

### For Instant Ease From COUGHING take BUCKLEY'S MIXTURE

It's like a magic touch. A Sweet Sixty Proof!

routine was the same. And as the nights passed Grace's contention was proved. His grip on life grew stronger because he was surrounded by people who sympathized with him and because he had to work.

Strangely enough, Molly had disappeared from the scene way that Al himself had vanished following her elopement. As soon as the first shock of Junior's death had been softened in his mind, Al, at Grace's suggestion, tried to trace Molly. When he heard how John Perry had gone through her money they were contented that she might be in want. But Molly had left the city, leaving no trace of her whereabouts. Not until months later did Al learn that she had gone to the home of a relative in the middle west. She never came back to Broadway.

As Al's second recovery progressed, so his plans and Grace's moved closer to materialization. Then came the day when he and Grace, with a few of their closest friends, stood in the church around the corner and were married. Marcella, Blackie Joe, and Bill Clune, Al's friends, were in that small group of friends. When the ceremony was over, Marcus whispered to Al:

"Boy, you've picked the right girl this time."

(To Be Continued.)

**Was Famous Detective**

Passing Of Frank Frost, One Of The Most Famous Scotland Yard Sleuths

After many years of well-earned fame, Frank Frost, one of the most famous of Scotland Yard's great sleuths, died recently in London, aged 72, after an operation.

One of Frost's most dramatic adventures was when he went to Argentina to arrest James Balfour, financial misdoer, on a mammoth scale, whose story belongs to nearly 40 years back. The detective found innumerable obstacles against him in getting Balfour out of Argentina.

Finally he got his man on a car attached to a locomotive which went at a breakneck speed to Buenos Aires, and despite the efforts to impede him, Frost got Balfour aboard a ship for England.

**Persian Balm—the peerless aid to loveliness. Leave no stickiness. A little gentle massage and it is swiftly absorbed by the tissues. Tonic in itself. Soothes and dispels roughness and chafing. Keeps skin soft and velvet-textured. Unrivalled for chafing distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.**

**Snake Goes On Hunger Strike**

Small Box At National Museum, At Ottawa Is Subjected To Forcible Feeding

With a rubber band around its throat to prevent it disgorging its meal, a small box among the collections of snakes in the National Museum, at Ottawa, broke a three months fast recently.

When the snake became thin and torpid, Clyde Patch, reptile expert at the museum, became worried. He tried to force a mouse down the snake's gullet, but the reptile, resenting his forcible methods, disgorged the mouse. Mr. Patch tried again and quickly wound the rubber band around the snake's throat with the result that the meal stayed down, and the snake gained weight and energy.

**Speaking For Himself**

"Call these prize cattle? Why, they're nothing but what our folks raise. My father raised the biggest calf of any man around our parts."

"Don't doubt it," remarked a bystander, "and the noisier."

Dragon flies possess eyes with as many as 30,000 facets, to furnish intense vision required in capturing darting prey.

### SORE CORNS

Removed by PUTNAM'S Corn Extractor

Al played on the long time without answering. Then he said quietly, "You're right, Grace."

Grace saw she had won the first battle but she knew there would be other skirmishes. However, the first battle was the most important—and the hardest.

Al stayed on with the Marcus review. Another song was substituted for "Little Feller," but otherwise his

### The Terror Of The Seas

Age Old Battle Of Mariners and the Elements

The storms which have been devastating the shipping around the northwestern shores of Europe and the British Isles, are said to have been the worst experienced in those waters in many years. How many seamen have been drowned, how many ships have struggled and died under their malevolent fury, is not yet ascertained. It may never be known.

"This," as Colquhoun says, "is a disintegrating power of a great wind."

... An earthquake, a landslide, an avalanche overtakes a man incidentally as it were—without passion. A furious gale attacks him like a personal enemy, tries to grasp his limbs, fastens upon his mind, seeks to rout his very spirit out of him."

That is the character of the desperate warfare which has been going on behind the brief news dispatches of ships in difficulties and battles washed ashore. It is a combat intermittent but recurring, as old as maritime civilizations which for so many centuries have launched their keels upon those troubled seas. The very names of the worst storms, Biscay, the Siltly Isles, the Goodwins, Dungeness—are the names of ancient battles and of considerable loss of life resulting. The famine areas particularly have been hard hit.

The venereal press published a dispatch from Sulistman district, in northern Shansi, estimating 15,000 adults, under-nourished adults and children were dead due to exposure. In the town of Fengchen, 2,500 were frozen to death. In Samsen, 2,000 died, and in Paochow 800 were killed by the cold.

Honan province reported the coldest weather since 1870. The Han River never broke blocks of ice, destroying thousands of junks. Hundreds of persons were drowned.

The Rengo News Agency said 700 soldiers were frozen during the movement of the second army. Bodies were sent back to Hankow by freight trains where soldiers and relatives were summoned by beating of gongs to come to the railroad yards and take charge of the bodies.

Fighting police reports said 167 men and 41 women had been found dead here since May, most of them frozen.

**Passing Of The Sleight Boys**

The automobile and snow-cleared roads have combined to hush the shrill bells that once made melody on the streets and highways. So rare is the sound of the chiming ring that, when it is heard, admits junle to the window to look and recall the old days and children to gratify curiosity with a strange sight.—St. Paul Pioneer Press

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, safe, and satisfactory relief.

With the 200-inch telescope now under construction, astronomers expect to peer into spaces of the universe three times as far as those heretofore penetrated.

**One Of Greatest Newspaper Editors**

Great Britain's Most Honored By City Of Manchester

C. P. Scott, chief proprietor of the Manchester Guardian, and until his resignation a few years ago, one of the greatest newspaper editors in Great Britain, will be honoured by the city of Manchester when the freedom of the city is conferred upon him shortly.

"C. P." resigned the editorship of the Guardian which he had held since 1904, and he has since been named into one of the most influential organs in the country. In July of last year, the task devolved upon his son, Edward Taylor Scott.

On that occasion "C.P." received from His Majesty a telegram congratulating him upon his editorship of the Guardian for 57 years, an achievement which His Majesty remarked, "was surely unique in the history of journalism."

**Clearing House For Youths**

Saskatchewan Government May Purchase Property Close To Regina For British Farm Boys

That the Saskatchewan Government is not contemplating training boys on a farm close to Regina, Hon. J. A. Morkley, provincial secretary and minister of railways, labor and industries, states.

On the other hand, he said, the government is considering a proposition to buy a home close to this city which would be used as a sort of clearing house or stopping place for British farm boys arriving in the province, thus relieving congestion at the University of Saskatchewan, Saskatoon.

Formerly situated about four miles north of the city is at present under consideration, although negotiations have not yet begun.

**Dogs Have Good Judgment**

Dogs have better judgment than humans at times. Ever notice a canine romp around a group of his instinct knows. He may be dumb, but somehow cynics and pessimists are not so sure. If a dog makes friends with you, you may be sure your disposition is of the right caliber. Even though he has fleas respect him for his perspicacity.

"Dear Lord," prayed the co-ed, "I don't ask anything for myself, just give mother a son-in-law."

It takes seven years to bring an orchid plant to maturity.

Minard's Wards Off Grippe.

### PHILIPS MILK

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude barks. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

**Cold Wave In China**

Reports State That Thousands Of Victims Have Perished From Intense Cold

Parts of China are being swept by the severest cold in sixty years, with untold suffering and considerable loss of life resulting. The famine areas particularly have been hard hit.

**Constipated Children**

Constipation is one of the most common ailments of childhood and the child suffering from it positively suffers. The bowels must be kept regular and the stomach sweet. To do this the children should take Baby's Own Tablets. They are a mild but thorough laxative, are pleasant to take and can be given to the newborn babe with absolute safety. Mothers and nurses use no other medicine for their babies than Baby's Own Tablets. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## WORLD HAPPENINGS BRIEFLY TOLD

The department of national defence has ordered 16 new light aircraft for use in connection with training in the Royal Canadian Air Force, at a cost of \$85,000.

The New Zealand Government has invoked force of arms to enforce its authority over British Samoa, and end the long resistance of Samoan natives to its government.

Immigration to Canada in the first eight months of the current fiscal year—from April 1 to November 30, 1929—totalled 138,440, a decrease of 2135 when compared with the corresponding period of 1928.

Four crusaders in the cause of greater markets for British Columbia lumber have left for the Antipodes for a four-month sojourn in Australia and New Zealand, studying the requirements of those countries.

A new military force will be guarding the Canadian and Mexican boundaries of the United States next July 1. If President Hoover's plan for a unified border patrol under the jurisdiction of the coastguard is approved by congress.

Chinaism is practically unchecked in the famine-stricken provinces of China. George Andrews, a missionary from Kansas province, told British and United States missionaries gathered at Shanghai, picturing scenes of almost unbelievable horror and death.

The past year has been one of marked progress for the Canadian Wheat Pool, according to an official report, which shows an increase in membership during the year of 5,815. Total membership at October 31st, 1929, was 49,915 with 4,623,309 acres under contract.

Ontario is not even close to having beer by the glass because public opinion does not justify it. Premier Ferguson told William Varley, secretary of the Building Trades Council of Toronto, who presented the argument of the Trades and Labor Congress of Canada to the Ontario cabinet, asking sale of beer by the glass.

## Why Dutch Are Sturdy

**Start Day With Breakfast Of Many Courses**

A Dutch breakfast is like no other meal in the world. There are, to start with, at least seven kinds of bread, plain white bread, ginger bread, plain buns, buns with raisins, brown bread, toasted biscuits, sweet cakes and a kind of fruit cake. You will find at least three or four kinds of meat, cold sliced veal, roast beef, ham and sausages.

Then, if you don't see it all at once, you smell the cheese, two or three of the Dutch specialties, including luncheon and Idam. There are several dishes piled with boiled eggs, and, of course, there are jams and honey and seasonal fruits. The climax is a pot of steaming coffee, not the insipid beverage of the rest of Europe, but the real thing from the Dutch colonies.

## Market For Fish In Australia

Possibilities of increasing exports of fish to Australia are seen in a recent report from the commonwealth showing the annual per capita fish consumption to be 14 pounds, as compared with 25 pounds in Canada and New Zealand, and 40 pounds in Great Britain.

## Canada's Fish Exports

A chart compiled by the Natural Resources bulletin of the Department of the Interior shows that Canada's fish are now sold in nearly a hundred countries and that these exports average in value about \$55,000,000 annually.

## Getting Bald?

You needn't mind a receding hairline falling hair and stimulates new growth—adds new hair to the entire scalp. Rub into scalp four times a week.

## Predicts League Will Enforce World

**General Smith Says All Nations Will Eventually Join**

In not more than ten years the whole human race including Russia will be represented at the council table of the League of Nations. This was the prediction of General Jan Christian Smuts, South African statesman, speaking at a dinner in New York, arranged as a part of the celebrations in the U.S. for the tenth anniversary of the founding of the league.

"It would be a very serious and a very tragic thing," said General Smuts, "if when all the nations of the world gather there, the seat of the founder and inspirer should remain vacant."

In this and other references he paid tribute to the late President Wilson, who will be represented at the council table of the League of Nations. This was the prediction of General Jan Christian Smuts, South African statesman, speaking at a dinner in New York, arranged as a part of the celebrations in the U.S. for the tenth anniversary of the founding of the league.

## B.C. Pichard Industry

**Now One Of The Most Important Branches Of Province's Fisheries**

Starting with the very small beginning of one plant and a catch of 300 tons in 1925, the pichard industry of British Columbia has assumed very large proportions and during the present year there were 23 plants in operation handling a total catch of 80,000 tons, making the industry one of the most important branches of B.C. fisheries. The product of the pichard oil and meal this season is valued at \$1,750,000, most of the oil going to the United States where it is used largely in the soap industry, while the meal is shipped to Germany, Japan and the United States.

## Ask Reduction Of Income Tax

**Canadian Chamber Of Commerce Submits Some Important Questions To Federal Cabinet**

The view of the Canadian Chamber of Commerce on a number of important national questions were submitted to Prime Minister Mackenzie King and members of the Dominion Cabinet, at Ottawa, recently.

Headed by Col. J. H. Woods, of Calgary, president of the chamber, a delegation waited upon the prime minister and his colleagues and presented a memorandum based on resolutions passed and subjects discussed at the Calgary meeting of the chamber last summer.

Such important matters as the construction of the St. Lawrence waterways; reduction of the income and sales taxes; seasonal unemployment; development of the Peace River country; construction of a national highway; inquiry into complaints of the fruit and vegetable industries; development of Empire trade, etc., were touched upon in the memorandum submitted.

In connection with the suggestion of the depletion of the further reduction of the income and sales taxes as when warranted by the Dominion's finances, and the avoidance of duplicatory taxation, Hon. C. A. Dunning, Minister of Finance, made a few comments. He pointed out that the federal income tax was a war measure, and that the Dominion still required money to pay war obligations.

Suggestions had been made by some of the provinces that the Dominion abandon the income tax. But, said Mr. Dunning, the Dominion could not do without this tax. Another suggestion had been made by certain provinces, however. That was that the field be divided between the Dominion and Provinces. The Dominion, for instance, might retain business income taxation and leave personal income taxation to the provinces. Without making any promises, Mr. Dunning asked the delegation to think over the situation with these suggestions in mind.

## FASHION

No. 824—Becoming Neckline. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 30 requires 2 1/2 yards of 40-inch material with 1/2 yard of 27-inch contrasting.

No. 139—Simple Everyday Frock. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 30 requires 2 1/2 yards of 40-inch material with 1/2 yard of 27-inch contrasting and 1/2 yard of extra material for Cascade Facing.

## SUNDAY SCHOOL LESSON

**STANDARDS OF THE KINGDOM**  
JANUARY 20

Golden Text: "Blessed are the pure in heart; for they shall see God." — Matthew 5:8.

Lesson: Matthew 5:1-48.

Devotional Reading: Psalm 24:1-4.

## Explanations and Comments

The Scene, verse 1, 2—Jewish rabbis usually sat while teaching, and Jesus followed the custom, surrounded by His disciples, the Twelve and also others. He "opened His mouth and taught them." In Matthew's Gospel this is a solemn way of introducing words of great importance.

Receipts For Blessings, verses 3-10—Blessed, with this word which these verses begin. We call them the Beatitudes, from "Beati," Blessed, the word with which they begin in the Latin version. Blessedness is higher than happiness. Happiness may seem to depend on circumstances; blessedness always depends upon relationship with God. Blessedness is a higher and better thing than mere happiness. Says a note in Weymouth's New Testament: "People who are blessed may outwardly be much afflicted. But from the higher standpoint they are to be admired, even if they are not happy." And who are the blessed? The poor in spirit, said Jesus. Poor in spirit is in no sense poor-spirited, rather it is the truest magnanimity. The poor in spirit are those who are conscious of their need of God, those who, in Dr. George D. Howard's words, "conscious, it may be, of great spiritual capacities, are at the same time conscious of their own sinfulness; and therefore kneel at the altars of heaven's supplies." Luke's version gives only "Blessed are the poor in spirit." In the postscript explains that the two statements are one and the same, for "the poor" was a recognized term among the Jews for those who had dedicated themselves to the service of God. They were, for the most part, poor in this world's goods, but they possessed God, and that is what He had attained blessedness. Blessed depends not on what one possesses, but upon what one is. For Heirs to the Kingdom of God. Notice that each Beatitude gives the reason. There are many definitions of the Kingdom of Heaven or Kingdom of God. As it is used here we may think of it as having for its members the followers of Christ, who they His teachings and seek to further His ideals. The Sermon on the Mount, which has been called "the Constitution of the Kingdom of God," contains a generous portion of His great teachings.

Robert L. Burnap  
Announcement has been made at Canadian National headquarters of the appointment of Robert L. Burnap as Vice-President in Charge of Traffic, with headquarters at Montreal, vice A. T. Weiden, the appointment being effective at once.

R. L. Burnap has been associated with the various lines which now comprise the Canadian National Railway System during the whole of his railroad career of 36 years.

## Recipes For This Week

(By Betty Barclay)

### ORANGE BREAD PUDDING

1 cup bread crumbs.  
2 tablespoons butter.  
2 cups scalded milk.  
2 egg yolks.  
1/2 cup sugar.  
Juice 2 oranges.  
Grated rind 2 oranges.

Soak bread crumbs, butter, and scalded milk thirty minutes; then add egg yolks, beaten with sugar, and orange juice and rind. Pour into a buttered pudding-dish and bake in a moderate oven until firm. Cover with meringue.

### GRAPEFRUIT MARMALADE

1 orange.  
1 lemon.  
1 grapefruit.  
Sugar.

Slice fruit very thinly, rejecting only seeds and core of the grapefruit. Measure fruit, and add to it three times the quantity of water. Let it stand in an earthen dish overnight, and next morning, boil for ten minutes only. Leave until next day, then boil two hours. Measure, add an equal amount of sugar, and boil, stirring occasionally, that it may not burn, until about four hours. Pour into sterilized glass jars, let stand covered with cheesecloth, until firm, then cover with melted paraffin.

Eastern newspapers have revived the controversy over the shortest poem in the English language. Years ago the New York Sun gave the prize to this one, entitled "Fleas."

Adam Had 'em.

## Wilder Silver Medal

**W. T. Macoun, Dominion Horticulturist, Is Rewarded For Good Work Accomplished**

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in the breeding of new varieties of apples and in the interests of horticulture generally. The award was announced at the meeting of the American Pomological Society, held recently at Roanoke, Virginia.

There is some uncertainty as to the position taken by sleeping elephants, but it is believed that they sleep lying down.

**The Improved Glass Substitute**  
COMES WITH A MESSAGE OF HEALTH

**THE SUN** is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. **WINDOLITE** is the sun's most important.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using **WINDOLITE** we are actually exposing our bodies to health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass. It freely admits the Ultra-Violet rays, and that its use insures the best conditions for the growth and development of plants and children, and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, discovery of **WINDOLITE** during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increased the egg-laying capacity and fertility of chickens, has greatly improved the health of stock, and is now being used in domestic and household requirements.

**WINDOLITE** stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, terrapahs, schools, factories, homes, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—quite weather and ordinary paint of colors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 84 inches only. A square yard of **WINDOLITE** weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 100 lbs. **WINDOLITE** is lighter and requires no varnish. **WINDOLITE** is made in England.

Price \$1.50 Per Square Yard, L.S.B., Toronto.

Use **WINDOLITE** and let **YOUR PLANTS** and **YOUR CHICKENS** and **YOUR CATTLE** benefit.

## WILL TAKE STEPS TO PROVIDE WORK FOR UNEMPLOYED

Winnipeg.—Several government departments have been requested to co-operate in as many ways as possible with municipalities and provinces in meeting the unemployment situation through such agencies as they are in a position to employ.

This is made known in a telegram received here by James Grant, chairman of the Manitoba Association of Unemployed Ex-Servicemen. The communication was received from Harry Baldwin, secretary to Premier Mackenzie King.

The telegram was in reply to one sent by Mr. Grant to the prime minister requesting immediate assistance for the unemployed ex-servicemen.

The departments that have been requested to co-operate with municipal and provincial authorities include the departments of public works and railways and canals.

While there has been no official pronouncement from the Dominion authorities, it is understood here that the government is considering commencing public works construction in various centres immediately to assist the unemployed. Ordinarily, the work to be undertaken would not be started for some months.

## Children Die In Fire

Three Smothered By Smoke Before Rescue Could Be Made

Hull, Que.—Fire which broke out here while they were playing about their home, took the lives of the three children of Mr. and Mrs. Pierre Parizeau here. The theories entertained as to the origin of the fatal blaze are that either the children were playing with matches or an electric heating plate set fire to the walls.

The dead are: Jean Paul, aged five years; Paulette, two years and six months; and Adrienne, seven months. The conflagration, breaking out during the brief period the mother absented herself to telephone from the ground floor apartment of the duplex in which the Parizeau family resided, gave off such a volume of smoke that the little tots were smothered before a rescue could be effected.

## Canada May Have

### Civil Service Council

Minister of Labor Forecasts Establishment This Month

Ottawa.—Establishment of the National Civil Service Council before the end of January was forecast by Hon. Ernest Manning, Minister of Labor, in addressing the civil service association of Ottawa. The council, modelled along the lines of the Whitley councils in Great Britain, will consist of representatives of each branch of the service and will act as liaison between the service and the government.

## May Face Prosecution

Rumored Proceedings May Start Against Persons Named In

Walden.—Although official confirmation is lacking, it is understood the justice department has decided to institute proceedings against more than 100 persons named in the report of Gordon Walden, K.C., as being parties to a combine in a restraint of trade.

Ernest Lapointe, Minister of Justice, said that announcement of the department's decision might be expected within the next few days.

## Express Foes For Islanders

London, Eng.—The Daily Express expressed grave fear for the inhabitants of Bartley Island off Carnarvon, who have not been reached from the mainland since December 15, due to the gale which has been most persistent since then. They were believed to be without food. There has been no response to beacon lights and other signals, which is declared to be unprecedented.

## American Women For Peace

Washington.—Five hundred women delegates to the Cause and Cure of War conference, appeared at the Senate office building in an effort to obtain the support of senators in behalf of United States adherence to the World Court.

## Will Be Guest At Banquet

Ottawa.—On his return from his tour in Western Canada, Hon. R. B. Bennett, Conservative leader, will be the guest of honor at a banquet in Clinton, Ont., on January 29.

W. N. U. 1521

## Start Hazardous Journey

Five Men Making Trip Across Rockies On Skis

Jasper.—Five young men have left Jasper, Alberta, on a 300-mile ski trip across the Rocky mountains to Banff. It will be one of the most hazardous adventures of its kind ever undertaken, and if the trip is successful, it will be the first time such a crossing has been made during the winter months.

The members of the party are Vernon and Allen Jeffry, Pete Withers, Frank Burtrum and Joe Weiss, all of Jasper Park, and all experienced mountaineers and skiers. They expect to conclude their trip by February.

The adventure was planned last spring and during the summer adequate caches were placed at strategic points along the route which, in some cases, will be more than 5,000 feet above sea level. At such altitudes very low temperatures, in some cases sixty below zero, are likely to be encountered, and the party will also have to face such dangers as unknown snow conditions and the possibility of trail guides that are available during the summer.

As far as is known this is the longest ski mountaineering ever attempted anywhere in the world.

## Korean Students Strike

Over Ten Thousand Said To Be Involved In Fight

Seoul, Korea.—One thousand Korean students including 250 girls, have been arrested as a result of a strike against the high school curriculum of two missionary institutions run by United States societies.

The strike involved students estimated to number 10,000. It occurred during the post-holiday examinations, and ostensibly out of sympathy for the students of the fatal bus accident. The December strike was said to have been due to long standing quarrels between Japanese and Korean students.

Many of those arrested last month are in prison. Japanese authorities believe the strike was instigated by a street society with Communist tendencies.

## Rust Resistant Wheat

Marquette Wheat Grown At Saskatchewan University For Some Years

Saskatoon.—Although Marquette wheat, now recommended by the University of Minnesota, is a productive variety, it is not resistant to rust. It was the plant breeders at that university, it has been grown at the University of Saskatchewan for a number of years, and has proved highly rust resistant and also to Marquette except for a slight yellowness of four color. The University of Saskatchewan has been growing the Marquette at the University of Saskatchewan and Dr. J. B. Harrington, in charge of this work, expects to have the results of the cross which gives great promise of extremely high yielding quality along with the rust resistance of the Marquette parent.

## Launch Big Undertaking

Alberta Livestock Pool Is Going Into

Lethbridge, Alberta.—The Alberta Livestock Pool will go into the packing house business, co-operative loans announced here recently. It was stated that definite steps were being taken to establish regular plants at Lethbridge, Calgary and Edmonton, the growers to be asked to become shareholders in the enterprise. The campaign in the south, sponsored by the Southern Alberta Co-operative Association, with 2,000 members, the largest co-operative livestock unit in the province—will be launched at once.

## New German Cruiser

Is Named After Vessel Sunk In Battle

Wien.—The new German cruiser "Koenig", 6,000 tons, was ceremoniously commissioned recently, replacing the old cruiser Amazona withdrawn from service. Commander Von Schroeder, in a speech, recalled that the first "Koenig" was sunk in battle in the North Sea August 28, 1914, and that only one man was saved after clinging three days to the wreckage.

## Application Withdrawn

Ottawa.—The board of railway commissioners has been advised that the application of the express association for increased rates on express material throughout Canada is withdrawn. The application for increased rates was made about a year ago and hearings have been pending since that time, until the association decided to withdraw its original demands.

## May Migrate To Mexico

Doukhobors Sending Delegation To Investigate Lay Out Land

Saskatoon.—Doukhobors of Canada district are sending six investigators to Mexico to investigate the possibility of land with a view to possible migration on a considerable scale when spring comes.

Decision to send the delegation, which will represent both brotherhood and independent doukhobors, was made at a largely attended meeting in Canada.

Of the delegation which is going to Mexico, two will be from the brotherhood of Unity, one from British Columbia, and the other three men are Seville Gheorgio, of Verigin; Wasyl Novokhodoff, of Buchanan; and W. Popoff, of Blaine Lake. Peter Verigin, well-known Doukhobor leader, whose father met a violent death in 1924, will accompany the delegation as far as New York. Verigin presided at the Canada meeting.

## FARMERS MUST MAINTAIN HIGH WHEAT QUALITY

Saskatoon, Sask.—Unless Canadian farmers maintain the high quality of their wheat, they are in imminent danger of finding no market for it, according to Major H. G. L. Strange, of Penn, Alberta, who addressed the convention of the Saskatchewan Field Husbandry Association at the University of Saskatchewan.

Strange, once winner of the grand award of the International Hay and Grain Show, at Chicago, and an enthusiastic seed grower has made a study of the conditions in respect to marketing wheat, not only in Canada but also in England and in continental Europe.

"The man who buys is the important man," stated Major Strange, "and not the producer. If we do not provide a product of quality and at a price which suits the consumer, we will not be able to sell it. Not long ago the crop was raised for two dollars a bushel and we were told that the world could not get along without our grain. During the last six months we have been shown how well the world can and will do without Canadian grain, for the millers of Europe have reduced the percentage of flour, from our wheat, which is mixed into their bread, from 35 to 10."

This, said the speaker, was not because they objected to the higher price altogether, but because the quality in the last few years has been sacrificed for quantity for production. Countries buying Canadian wheat are devoid of sentiment, and are concerned only in their grain to their own use and then buy goods from the States. The Argentine buys goods with the money received for their wheat, and keeps a good customer. Sheer economy necessarily compels the British buyers to go where they can get the most value for their money and sell the most goods in return.

Russia is again in the market, and as a result, the price of wheat drops eight cents in Canada. There is no reason for Canadian farmers, with the advantage in methods they have gained in the past five or ten years, not holding their wheat to the highest standard it is kept up. The only way to do this is to follow the advice of Cato, who two thousand years ago, said: "Plough well, sow good seed and keep down the weeds." The C.B.G.A. offers facilities for the procuring of good seed equalled by no other organization in the world, and it is up to the farmer to protect his own interests.

## COUNTRESS OF SEAFIELD

The engagement has just been announced of the Countess of Seafield, youngest British countess in her own right, and one of the richest women of England, to Derrick Studley Herford, formerly an officer in the Grenadier Guards. He is now engaged in business in London.

## Have Important Task

Committee Will Try To Co-ordinate

Geneva.—The personnel of the important committee which will have the task of bringing the league's disarmament covenant into harmony with the Kellogg-Briand peace pact, has been named by the council of the League of Nations.

The members, meeting on February 12, will be: M. Adachi, Japan; Lord C. Great Britain; H. B. von Dure, Germany; E. Colan, Spain; Mariano Cornejo, Peru; Pierre Cote, France; Vittorio Scialoja, Italy; Francesco Siko, Poland; Nilsen, Norway; Humana, N. Uden, Sweden; and Woo Kai-Seng, China.

Their task will be to fill in the gaps in the league covenant which tacitly allows armaments consistent with national security and implies action by league members against a nation which starts an aggressive war. The later pact of Paris renounces war altogether.

## Selecting Winner Of Trophy

Trans-Canada Air Award To Be Made

Ottawa, Ont.—The Department of National Defence has sent a circular letter addressed to all aviation concerns in Canada inviting recommendations for guidance in the award of the McKee trans-Canada trophy.

The trans-Canada trophy, donated by the late J. Daniel McKee, is awarded annually to the Canadian pilot making the greatest contribution towards the advance of aviation in this country during the year. Piled in the employ of government services are buried.

Last year the trophy was won by "Punchy" Dickins, and the year before by Captain H. A. "Doc" Oaks.

## Naval Architect Dead

Victoria.—One of the most widely known architects of his day, and who had to his credit the building of three Spanish cruisers that took part in the battle of Santiago, in 1898, and was founder of the steel ship building industry in Japan, is dead here in the person of James Stewart Clark, following a prolonged illness. He was a native of Toronto, Ayrshire, Scotland, and was eighty years of age.

## Chinese Railroad

Fun-Ko Choy, special representative of the Ministry of Railways for the Chinese National Government at Nanking, China, (right), who arrived at Saint John, January 4th, from Great Britain, on board the Canadian Pacific "Duchess of Richmond" (left), Mr. Choy is greatly interested in Canadian railroading, and when in Montreal, had conferences with Grant Hall, Vice-President of the Canadian Pacific Railway, and with other officials. Mr. Choy expressed himself as deeply impressed with the Canadian Pacific System.

## Vessel Adrift On Atlantic

Reward Is Offered For Return Of Schooner To Newfoundland

Halifax.—A reward of \$1,000 is being offered by the government of Newfoundland to any officer of any navy who should the schooner "Neptune" and brings back to Newfoundland the vessel that is drifting at the mercy of sea and wind somewhere in the North Atlantic. Her captain, accustomed only to shore navigation is unable to bring her to port.

This information, broadcast from Cape Race, was received by C. H. Harvie, local marine and fisheries agent. Hundreds of ships crossing the Atlantic would pick up the message. The schooner has been drifting helplessly since it left St. John's Nfld., on November 29, and was driven out to sea by a hurricane that scattered the fleet of 10 vessels with which the "Neptune" had left for home ports on the northeast coast of Newfoundland.

The "Neptune," carrying 10 persons, was reported "all right," 720 miles southeast of Newfoundland on December 15.

## U.S. Automobile Fatalities

Figures Show 31,500 People In 31 States Killed In Auto Mishaps

Chicago, Ill.—Figures made public by the National Safety Council show that 31,500 persons were killed in automobile accidents in 31 states during 1928.

The total was 13 per cent. more than in 1928, the report said, while motor vehicle registration increased only one per cent.

More than half the victims were pedestrians.

## TAKE HOPEFUL VIEW OF SUCCESS OF NAVAL PARLEY

London, Eng.—Great Britain can only move on the principle that other nations move correspondingly with her, and that when an agreement on naval disarmament is arrived at, it shall represent an international policy adopted by the other nations as well as Great Britain, this comprised the keynote of the formal remarks made by Prime Minister Ramsay MacDonald when he met a couple of hundred newspaper correspondents of all countries, both resident in London and specially sent to the British capital, who will report the naval disarmament conference.

Among points the prime minister stressed were that Great Britain is looking for the eventual elimination of the battleship, both on account of its tremendous expense (Mr. MacDonald said they cost £7,000,000 apiece), and also because of the differences among naval experts as to their utility. Until battleships are eliminated it is sought to effect a gradual reduction in their tonnage and gun-power when replacements are made.

British authorities, the prime minister continued, took a hopeful stand in the negotiations, and such as the Locarno pact, the optional clause of the world court agreement, and the pacts of Washington and Locarno, and the pacts of additional regional agreements. These instruments had already given the whole world a greater feeling of security, so that if the risk of war had already been reduced, it was surely reasonable, he said, to expect armaments could be reduced.

Premier MacDonald stressed that if the conference failed, it would mean the world would be faced with 10 or 20 years' competitive naval building. But he was confident it would succeed, and that the greatest challenge the society makes in reducing navies to the lowest level consistent with national safety.

Today, said Lord Bridgeman, first Lord of the Admiralty, in the former Conservative Government, attacked the Labor Government for lowering the British level of cruisers necessary for Empire defence, from 70 to 50. The justification for this given by the government, the improved aircraft resulting from the Paris pact, "is most unconvincing," Lord Bridgeman said.

Speaking to the British Naval League, Lord Bridgeman added the belief that some agreement might be reached in a spirit of give-and-take, but others must give as well as ourselves.

At another meeting, Vice-Admiral E. B. Taylor also expressed grave fears for the future of Britain's naval defences and some doubts as to the security offered by the Kellogg-Briand pact.

"The Kellogg pact is no guarantee whatever that war is a thing of the past," Vice-Admiral Taylor declared.

## ANTI-LIQUOR CAMPAIGN TO THE FORE IN THE U.S.

Washington.—The close of the first decade of national prohibition in the United States, found anti-liquor leagues flourishing prominently in the news from widely separated sections of the nation.

At Washington congressional committees prepared legislation to carry out recommendations for improved enforcement, sponsored by President Hoover and the law enforcement community.

Chairman Wickerham, of the commission, issued a statement supporting the constitutionality of the proposal for trying minor prohibition cases before U.S. commissioners. Leaders of the anti-saloon league met at Detroit and began sessions with addresses declaring for "an aggressive, militant fight until county and city submit to the law."

An announcement was made at Lansing that Michigan state police will use machine guns and tear bombs to prevent run running.

Governor Green, of Michigan, commuted the sentences of five prohibition law violators serving life terms in the state's formal criminal code. Governor Dillon, of New Mexico, recommended the use of the army to patrol the borders as a test of the dry laws.

Governor Richards, of South Carolina, ordered Judge J. Jackson, Fla., ruled against and other officers must have definite knowledge that an automobile can't liquor before the violator is arrested.

At Oklahoma City, 102 persons charged with conspiracy to violate dry laws were arrested in a motion picture hall of participants.

## Governor-General Returns

Party Of Prominent Persons Greet Lord Willingdon At Ottawa

Ottawa.—After an absence of six weeks spent in a cruise to Bermuda and the West Indies, their Excellencies the Governor-General and Vice-countess Willingdon returned to the capital recently. They were warmly greeted at the union station by a party of prominent persons including Premier Mackenzie King, and Rt. Hon. E. A. Tamm, Chief Justice of the Supreme Court, who acted as administrator in His Excellency's absence.

## Want Old Age Pensions

Immediate Acceptance Of Government Pension Plan Is Urged For

Quebec, Que.—William Tremblay, Conservative M.L.A. for Malouine, urged the immediate acceptance by the Quebec legislature of the Dominion old-age pension provisions, speaking in the legislative assembly, in the course of the debate on the address in reply to the speech from the Throne. He argued that the people of Quebec were siding in the payment of pensions in other provinces through the Dominion taxes and getting nothing for their own aged people.

## Dry Educational Campaign

Detroit, Mich.—A \$50,000,000 dry educational campaign was outlined at a meeting of the anti-saloon league held here last week by Dr. Ernest H. Cherrington, who declared that education against alcoholism presents the greatest challenge the society makes in reducing navies to the lowest level consistent with national safety.

Today, said Lord Bridgeman, first Lord of the Admiralty, in the former Conservative Government, attacked the Labor Government for lowering the British level of cruisers necessary for Empire defence, from 70 to 50. The justification for this given by the government, the improved aircraft resulting from the Paris pact, "is most unconvincing," Lord Bridgeman said.

Speaking to the British Naval League, Lord Bridgeman added the belief that some agreement might be reached in a spirit of give-and-take, but others must give as well as ourselves.

## Run On Parrots

Berlin.—The official gazette prohibited the importation of parrots into Prussia to guard against the spread of the disease of "parrot fever," discovered in many parts of Germany. The embargo is effective immediately and until further notice.

There are more than 19,000 doctors in the United States who practice as specialists only.

## CHAMPION CHATTER

VOL. 1

Thursday, January 23, 1932

No. 48

Published in the interests of the People of the Champion and Farmers of this vicinity.  
GEO. L. DEPUÉ, Editor.

Nearly everyone is now planning seeds, fertilizers, etc. It will pay just as well to plan ahead for your poultry. Last year the capons brought as high as 80 cents in the metropolitan markets. It may be that caponing this spring will help you cash in on the fine, expensive meat.

Our heartfelt sympathy and deepest regrets go out to the Anderson family in their bereavement.

We have always insisted that Harry Smith was a progressive up-to-date farmer. His recent purchase of a McCormick - Deering Tractor and Harrow Plow proves us right.

Time and tide wait for no man, but time

"Good Equipment Makes a Good Farmer Better."

always stands still for the woman past thirty.

Harry Carter left for Calgary on Wednesday train to undergo an operation for appendicitis.

We are glad to announce that we have lately outfitted a tractor service station in which we shall render strictly modern service.

We invite you to come in and inspect the new station, meet the boys, and see the special tools which we have secured in order to do the best kind of work in the least time.

A teacher of geography asked little Johnnie if he knew how many miles there were between Johnnie and his mother. Johnnie replied: "No ma'am, but I lives next door to us."

Mrs. Harold Matlock quite ill and an operation seems to be inevitable. We hope that

your recovery is quick and complete. Mrs. Harold.

Don't forget the date of our tractor school on Feb. 5. There will be something of both interest and entertainment there for you.

Brevity is the soul of wit—and the charm of women's skirts.

Herbert Willes is reported to be slowly recovering.

Here's one for your brain to unravel. "Watchogona package?" "Sabak." "Wassaninuvit?" "Sadichunery, full-naine. Wif's gonna gettapleedng angatnainferin."

## Local and General

Mr. and Mrs. G. M. Campbell attended the moving picture convention in Calgary.

Mrs. Grey of the Guest Ranch has been ill but is improving.

P. M. Patterson and his brother, D. W. Patterson of Grand Prairie, left last Saturday on a visit to their old home in Ontario.

A lovely girl, a bashful boy, a hopeful dad—and what happened to dummies in a mighty football war. That's "Win That Girl"—Sat. Nite.

The Ladies' Aid will meet at the home of Mrs. J. N. Beaubier on Thursday, Jan. 30. Mrs. Bell, assisted by Mrs. Caldwell, will serve.

Miss Ada Williamson entertained a very pleasant birthday party on Friday. A variety of games were enjoyed and the seventeen girls present had much fun.

K. R. McLean, R.O. of Anderson & McLean, Sight Specialists 208 8th Ave West, Calgary will make his monthly visit to Champion Friday, January 31, at the Drug Store.

A bevy of little girls gathered at the home of Betty Lou Aubrey on Saturday, Jan. 18th. The merry guests were charmed by the dainty favors provided by their hostess.

The Georgian Singers, the finest entertainment ever brought to Champion and the regular picture show is rare entertainment for everybody—this Sat. Nite Jan. 25th.

Aleat U.F.A. will hold a meeting in the community hall on Monday evening, Jan. 27th, at eight o'clock. Everyone interested is invited to attend this meeting.

A letter was received from Mr. and Mrs. C. L. Robinson, box 244 Junction City, Oregon, thanking the O.E.S. and people in Champion for the help and kindness shown them in their trouble. Mrs. Robinson is still on crutches but can take a few steps without them. The baby is in the best of health.

## In Memoriam

No one knows how much we miss her. No one knows the bitter pain we have suffered since we lost her. Life will never be the same.

In loving memory of Dear Bessie who passed away on January 27, 1929. Mother and Father.  
Evelyn Fay Watts

## Pioneer Club Celebrates

(Continued from front page.)

Dancing was then resumed, interspersed with a few dances by some of the old favorites in that line of activity. A number of those present played cards and enjoyed meeting friends which they only meet at this gathering.

The gathering broke up about 5:00 a.m., bringing to a close one of the most successful gatherings of the Cleverly Pioneer Club.

## A Second Version

The annual gathering of the Cleverly Pioneer Club was held in the Community Hall on Friday 17th. As usual at this event there was a large attendance of old timers, who always enjoy the social side of these gatherings, one old timer (Mr. Glenn Smithson) coming 800 miles to be there, from Billings Montana. A very good program was rendered by local talent—Vocal Solo's by Mrs. Chas. McLean, Mrs. D. Chamberlain, violin by Miss M. Ferguson, recitation by Mrs.

We will handle your horses in trade. A good demand at present, which means good prices.
